

WE ARE ALL SCULPTRA

ONE TREATMENT, ENDLESS POSSIBILITIES INSIDE NINE UNIQUE PATIENT JOURNEYS

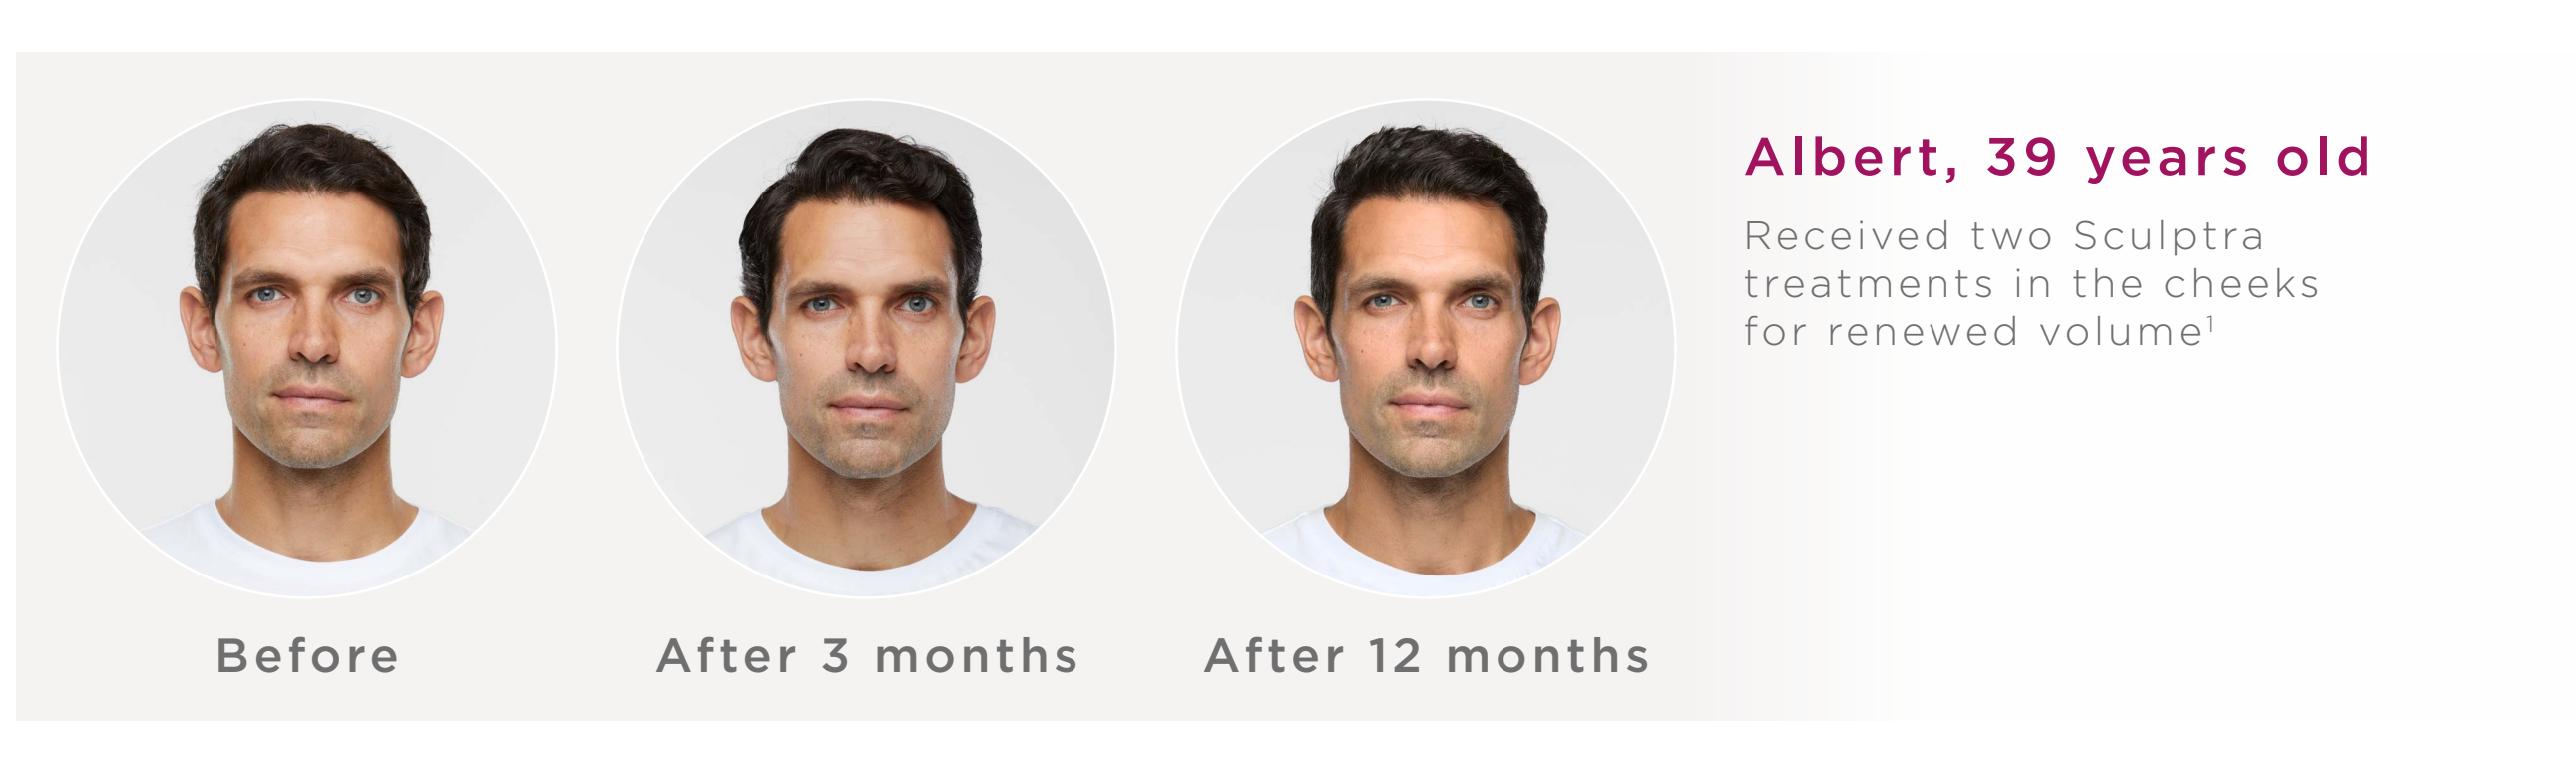

We Are All Sculptra is a unique program showcasing the impact of Sculptra® – **the first proven regenerative biostimulator** – over two years for nine **diverse patient profiles**, who were all new to aesthetics with unique treatment goals.¹⁻⁶ Each patient's journey reveals not only how Sculptra can adapt to different skin types, life stages, gender identities, and aesthetic goals, but also how it can help to renew confidence, self-recognition, and a sense of empowerment.¹

GET TO KNOW THE PARTICIPANTS, THEIR CONCERNS, AND THEIR TREATMENT GOALS:

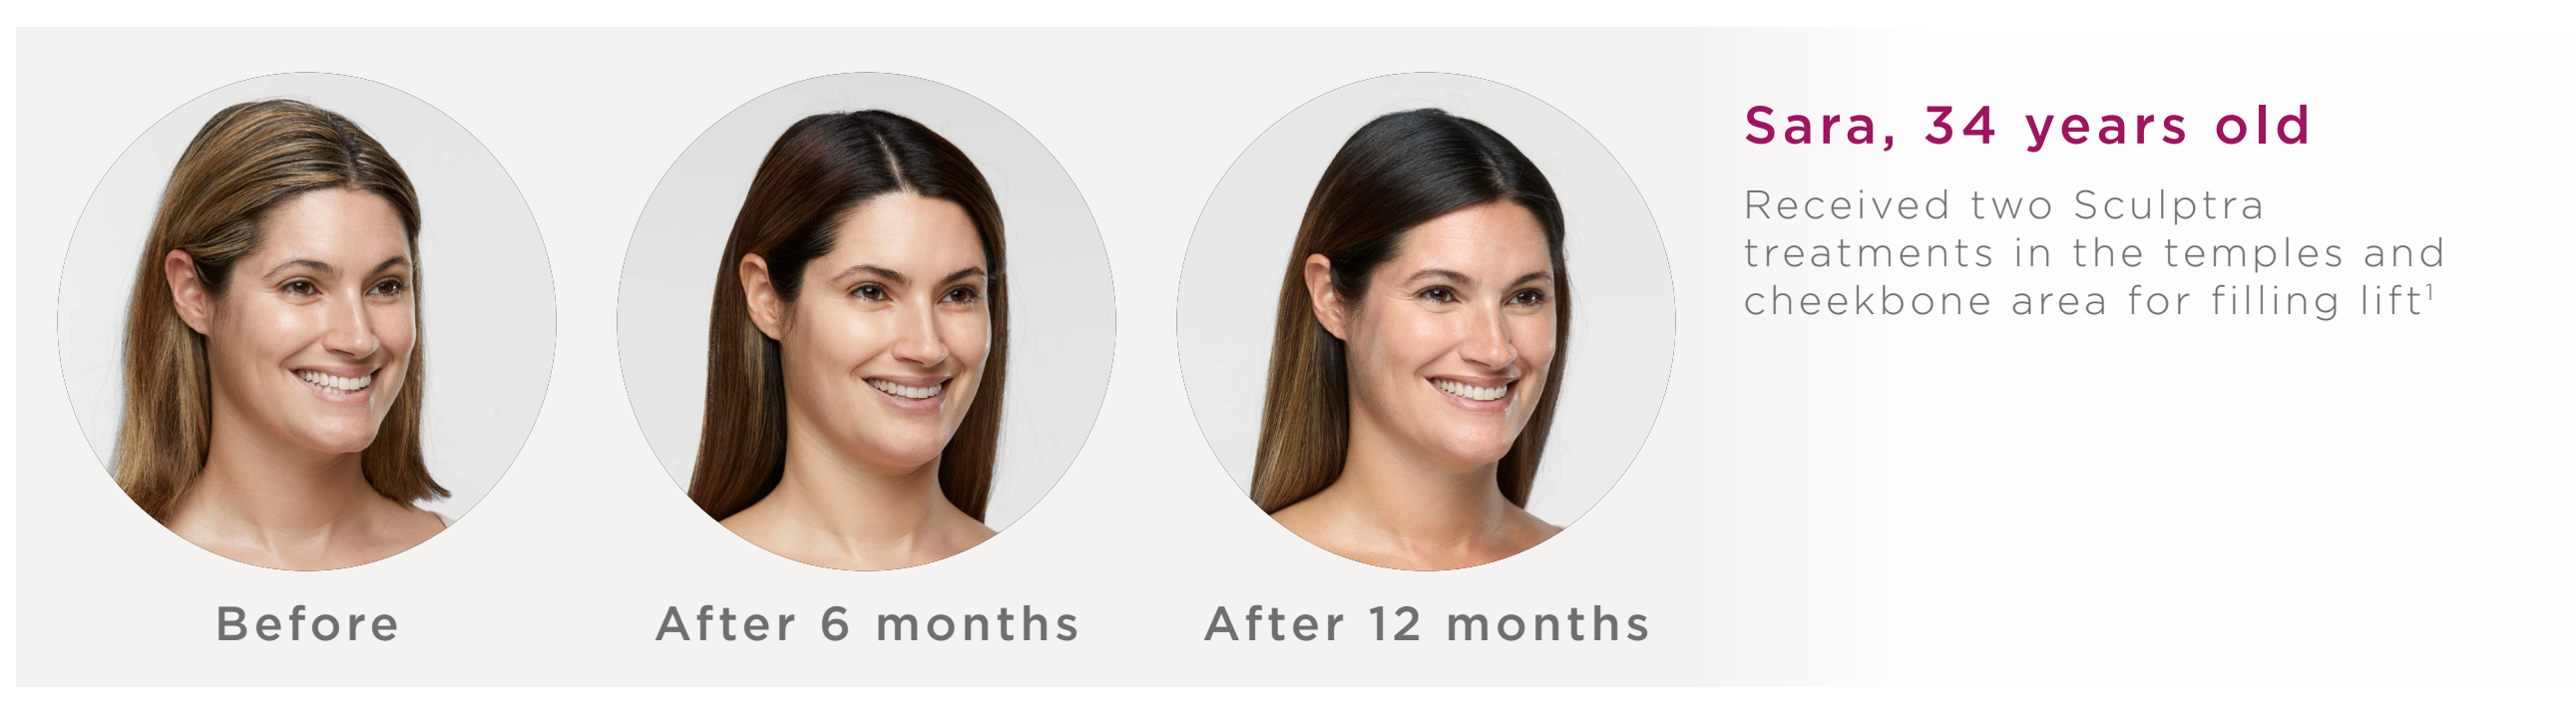

Transformations with Galderma's **AART™ of Sculptra methodology** – a personalized assessment and treatment approach built around patients' unique facial structure and needs¹

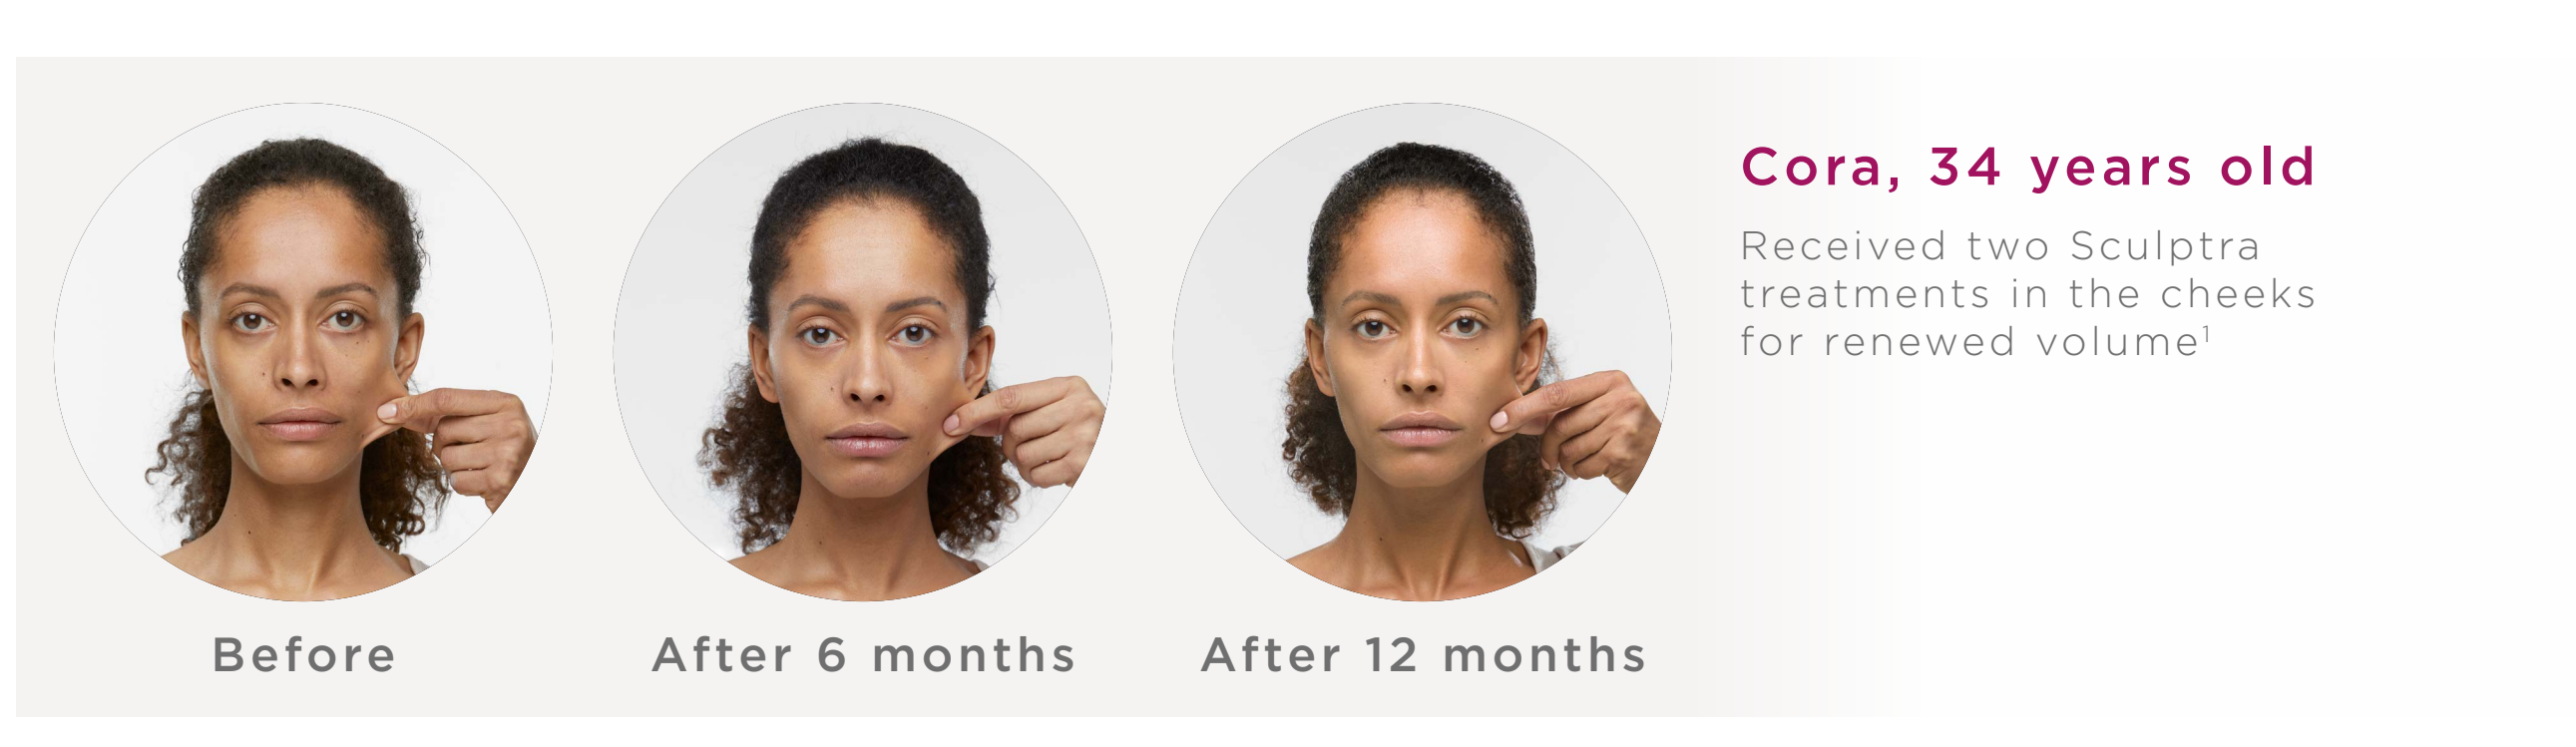

*“The Sculptra journey for me has been the gift that keeps on giving. I'm really impressed that it's lasted for 12 months, and the fact that it's going to continue for the next 12 months is just such an added bonus. Now I like to be clean shaven so that I can actually see the benefits on my skin. Sculptra really stood out to me because it showed very **natural** results, and it was very **gradual** over time.”*

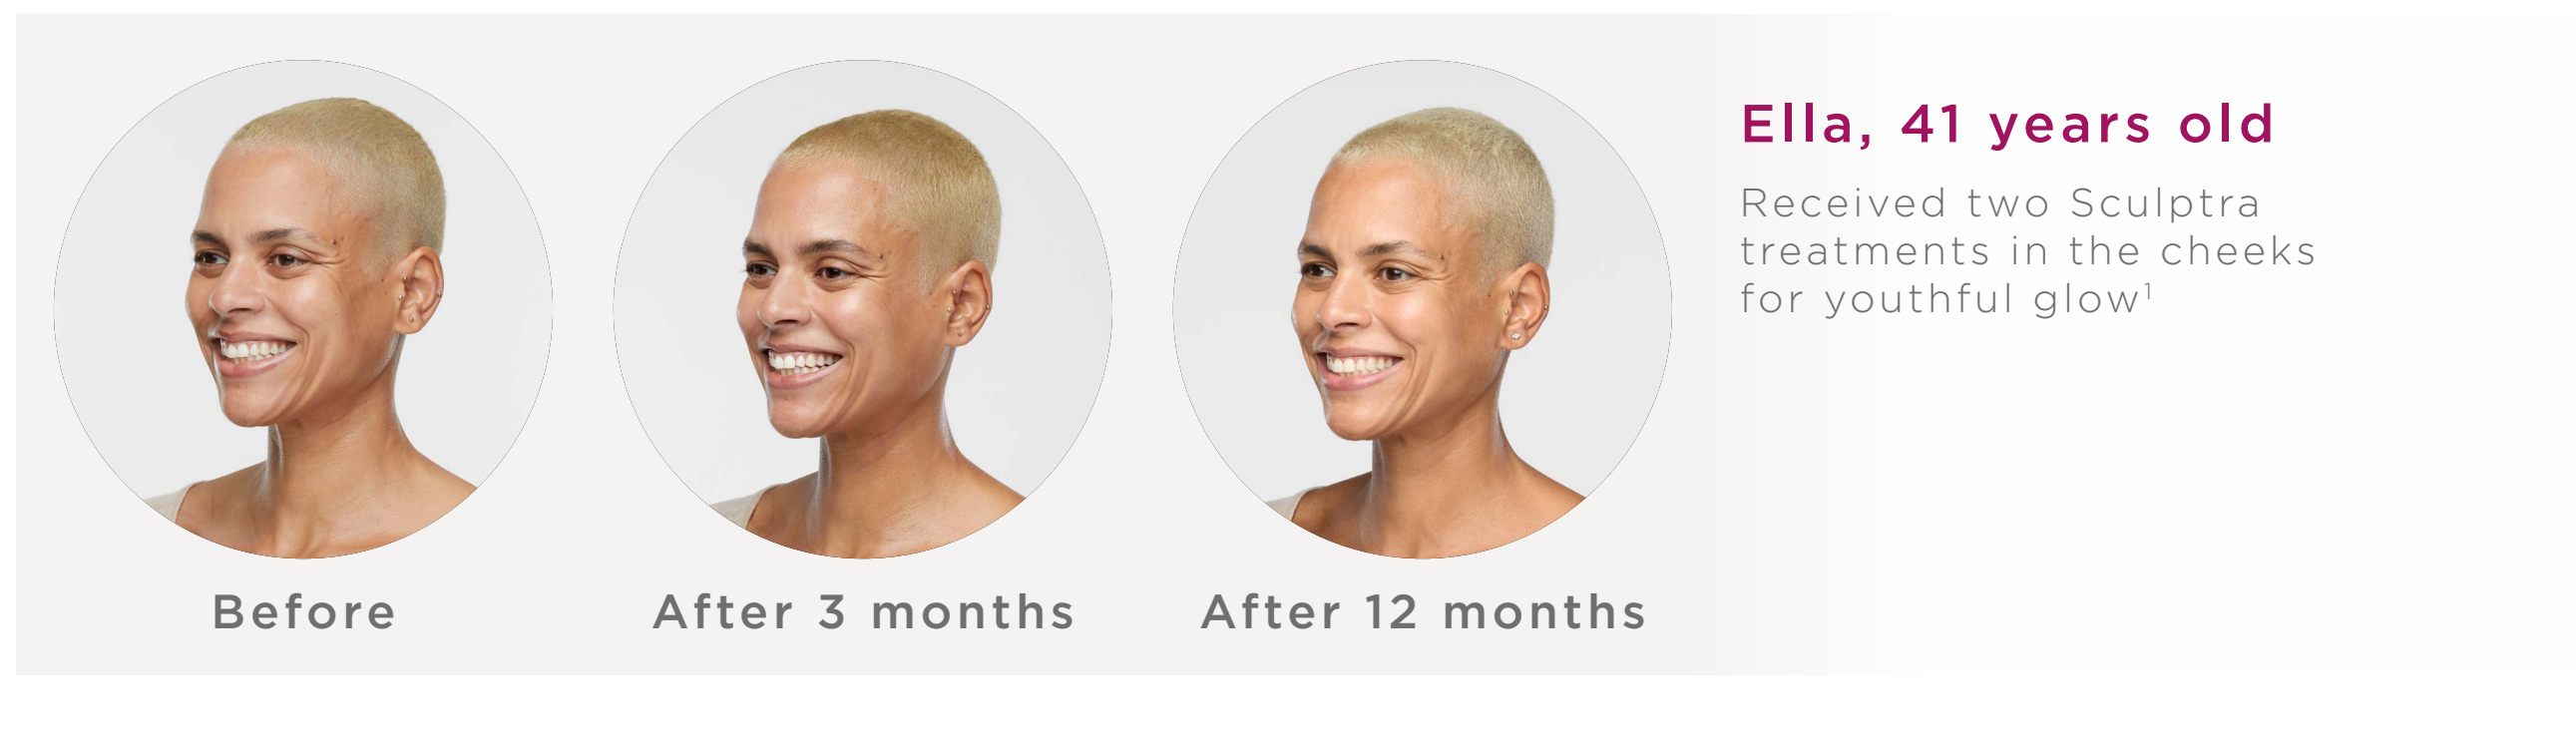

*“Sculptra has meant to me **confidence** building. To look in the mirror and enjoy what I'm seeing is such a blessing. I think the moment that I started noticing a very visible difference is when I stopped wearing makeup as much and not doing my skincare as much. Friends are asking what I have been using on my skin, because it looks amazing. I'm not afraid of getting old anymore.”*

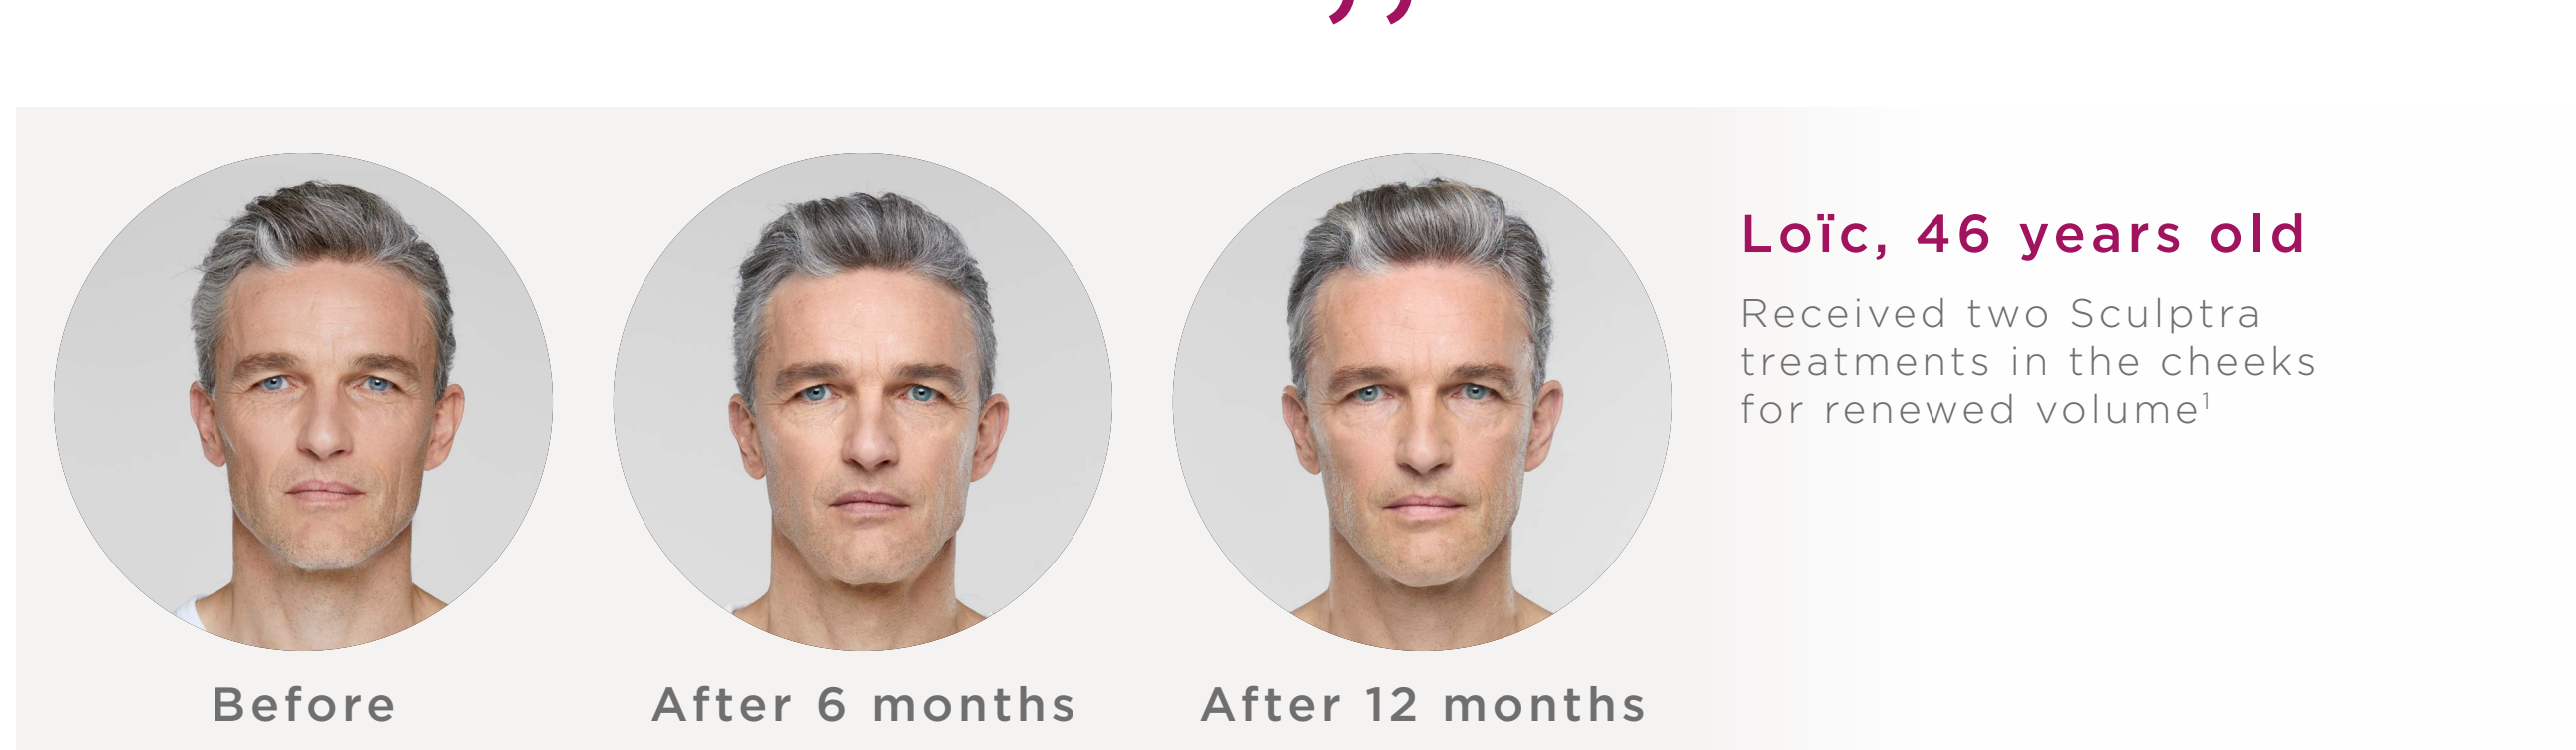

*“The treatment completely restored my self-confidence. Today, when I look at myself in the mirror, I feel really good – I feel **prettier** and **younger**. When I look at my face, I am delighted because I have much more **volume** in my cheeks, and I look **healthier**. I realized that real changes were happening when I was asked if I was a student while taking my 10-year-old daughter to the movies.”*

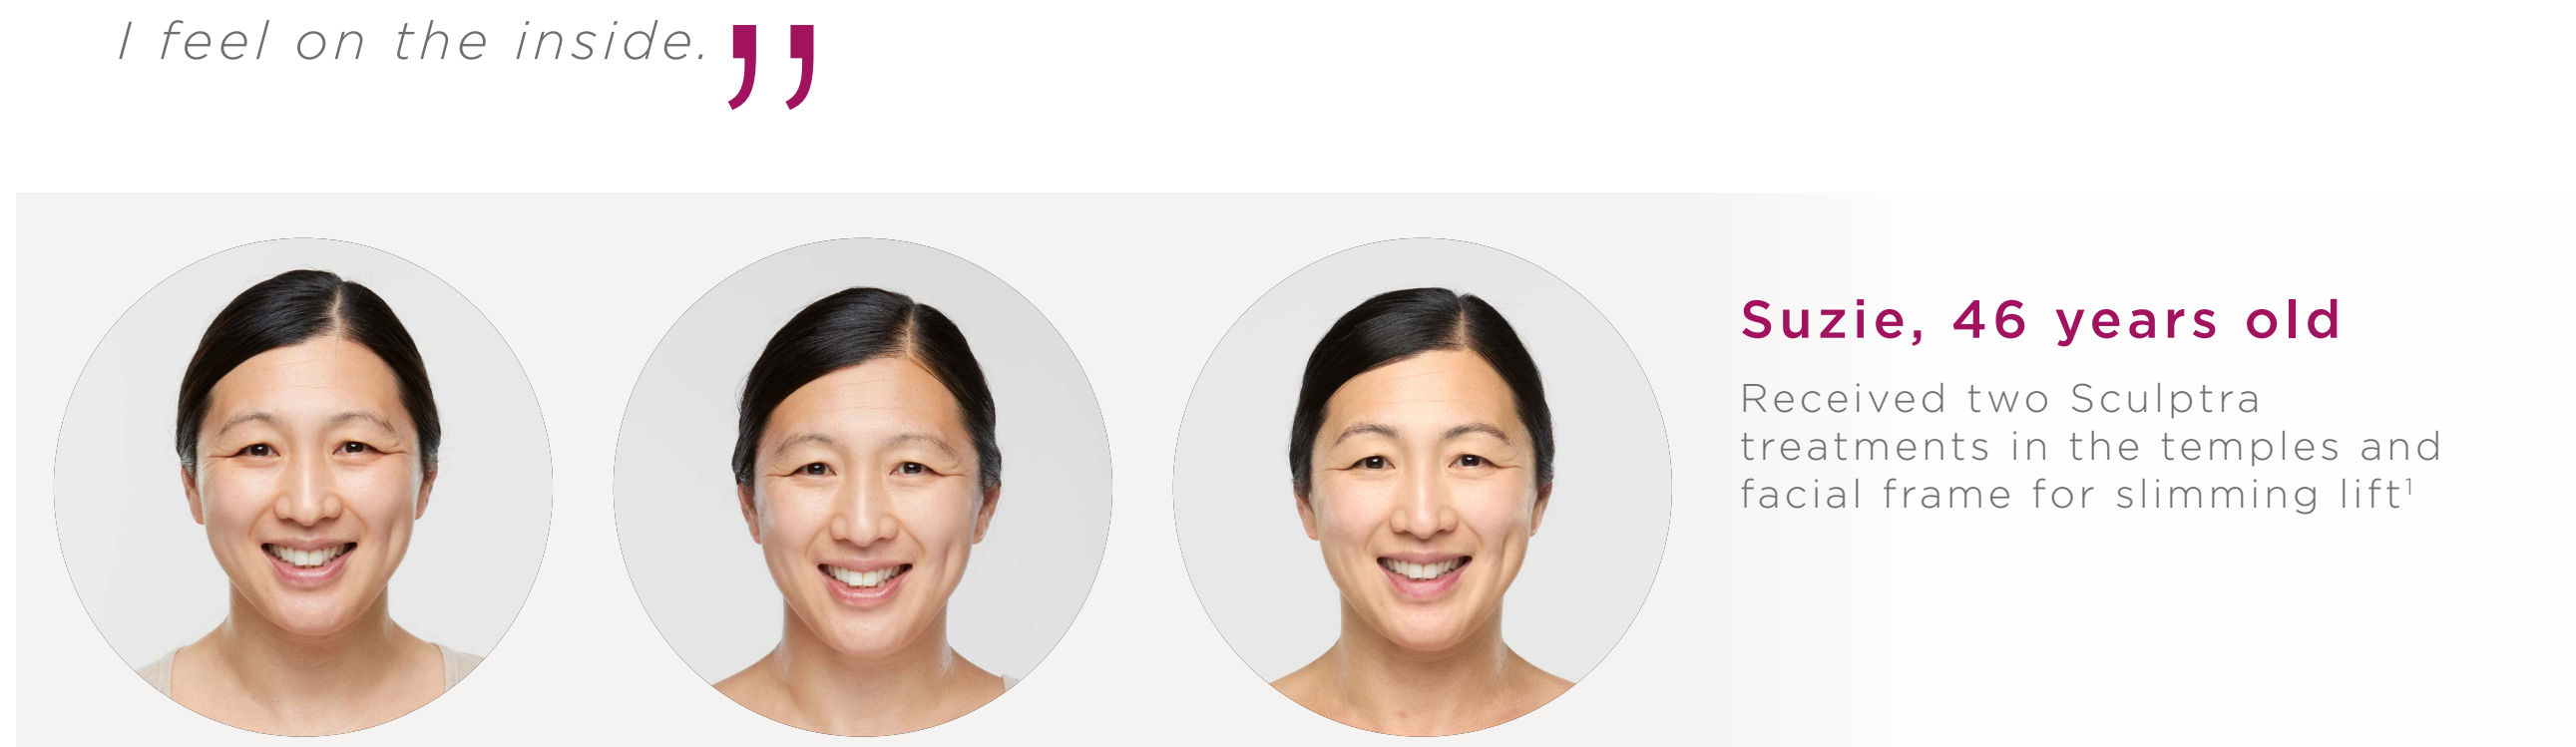

*“My results have more than reflected what I was hoping for in the beginning. When I look in the mirror today, I see **glowing** skin, I see **refreshed** skin, and I see a really happy face. People have asked me what I'm doing, people have asked if I've changed my skincare routine and it's been really nice to be able to say actually I've tried Sculptra and it's really worked for me. This journey has been a real opportunity for me to invest in myself. I feel effortlessly refreshed and alive.”*

*“Sculptra has given me a lot of **confidence**, and I have to say that I can look forward to turning 50 with a lot of pride. Every morning when I look at myself in the mirror, I feel ready to tackle a tiring day, because I feel strong, **fresh**, and **radiant**. It's the perfect treatment for me. I can age peacefully.”*

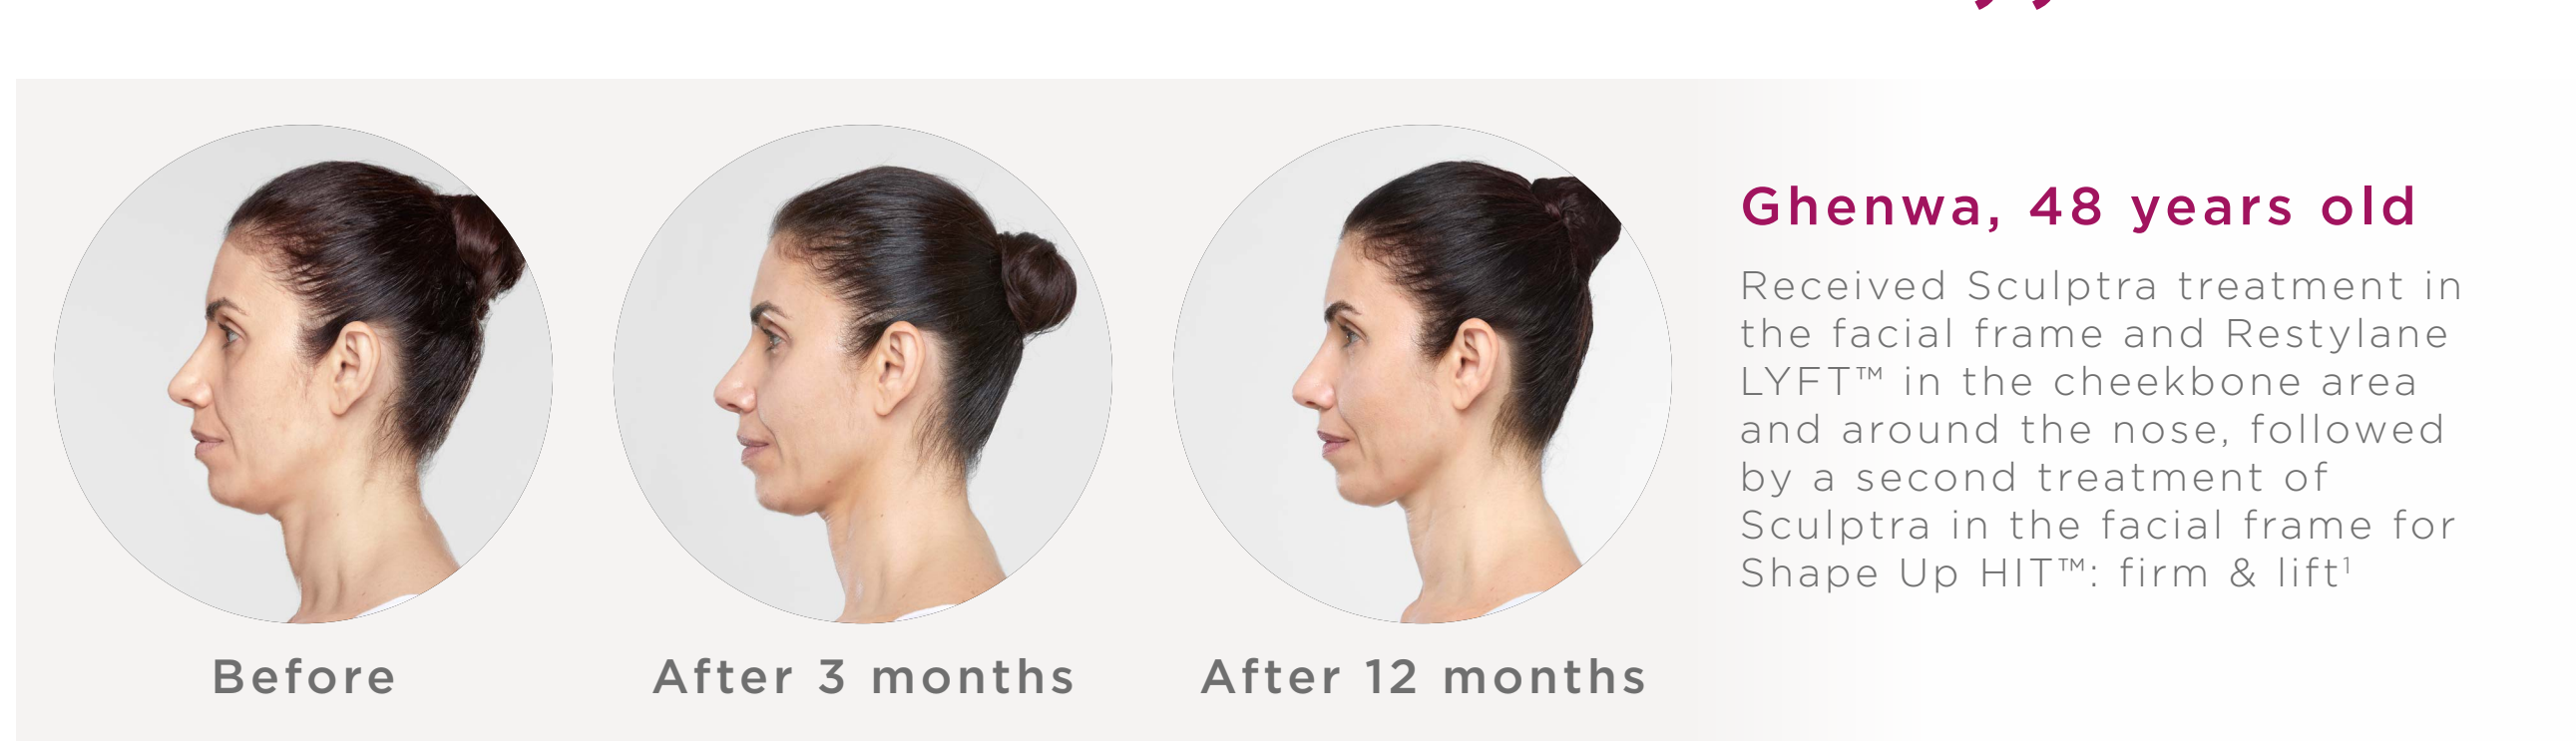

*“The results are exactly what I was hoping for. I didn't realize before how much I use makeup as a mask, but after the treatment I've not been wearing as much makeup, and I feel so much more **confident**. I feel whole again. I feel that what I see on the outside matches how I feel on the inside.”*

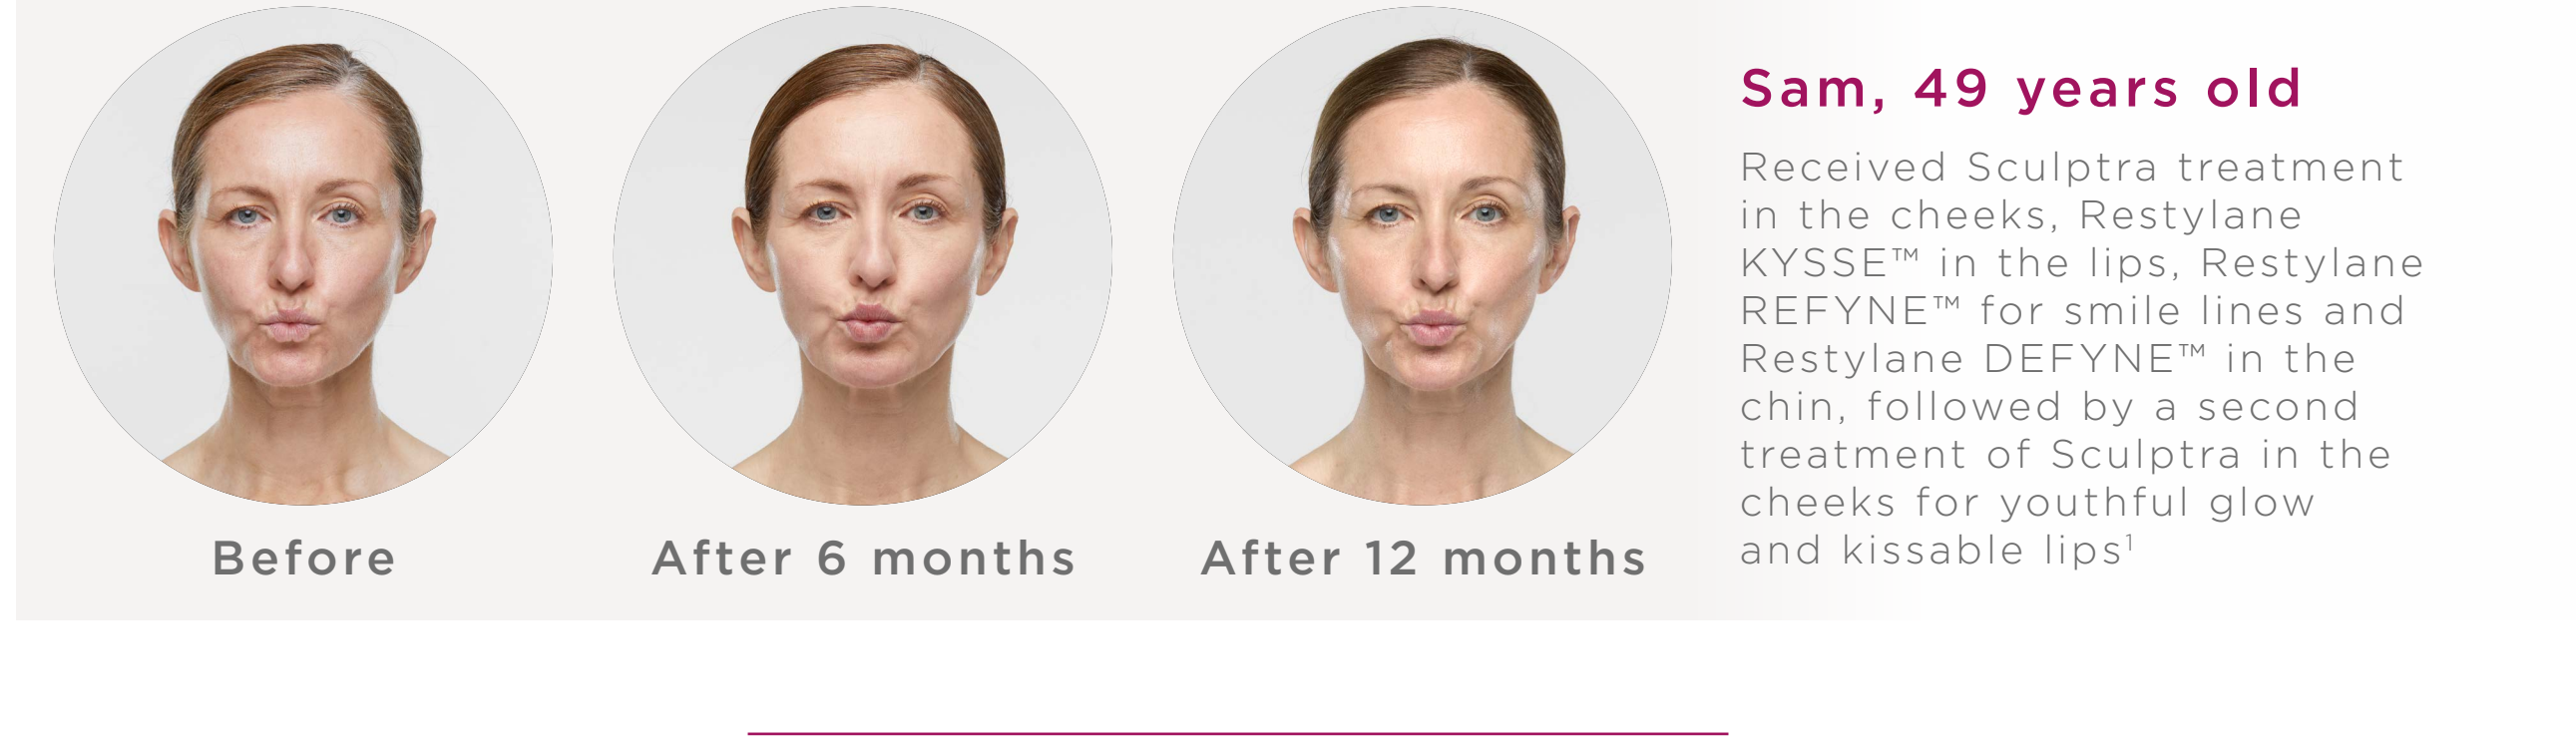

Transformations with **Galderma's HIT™ (Holistic Individualized Treatment)** protocol combining Sculptra and Restylane® hyaluronic acid treatments for holistic, individualized results¹

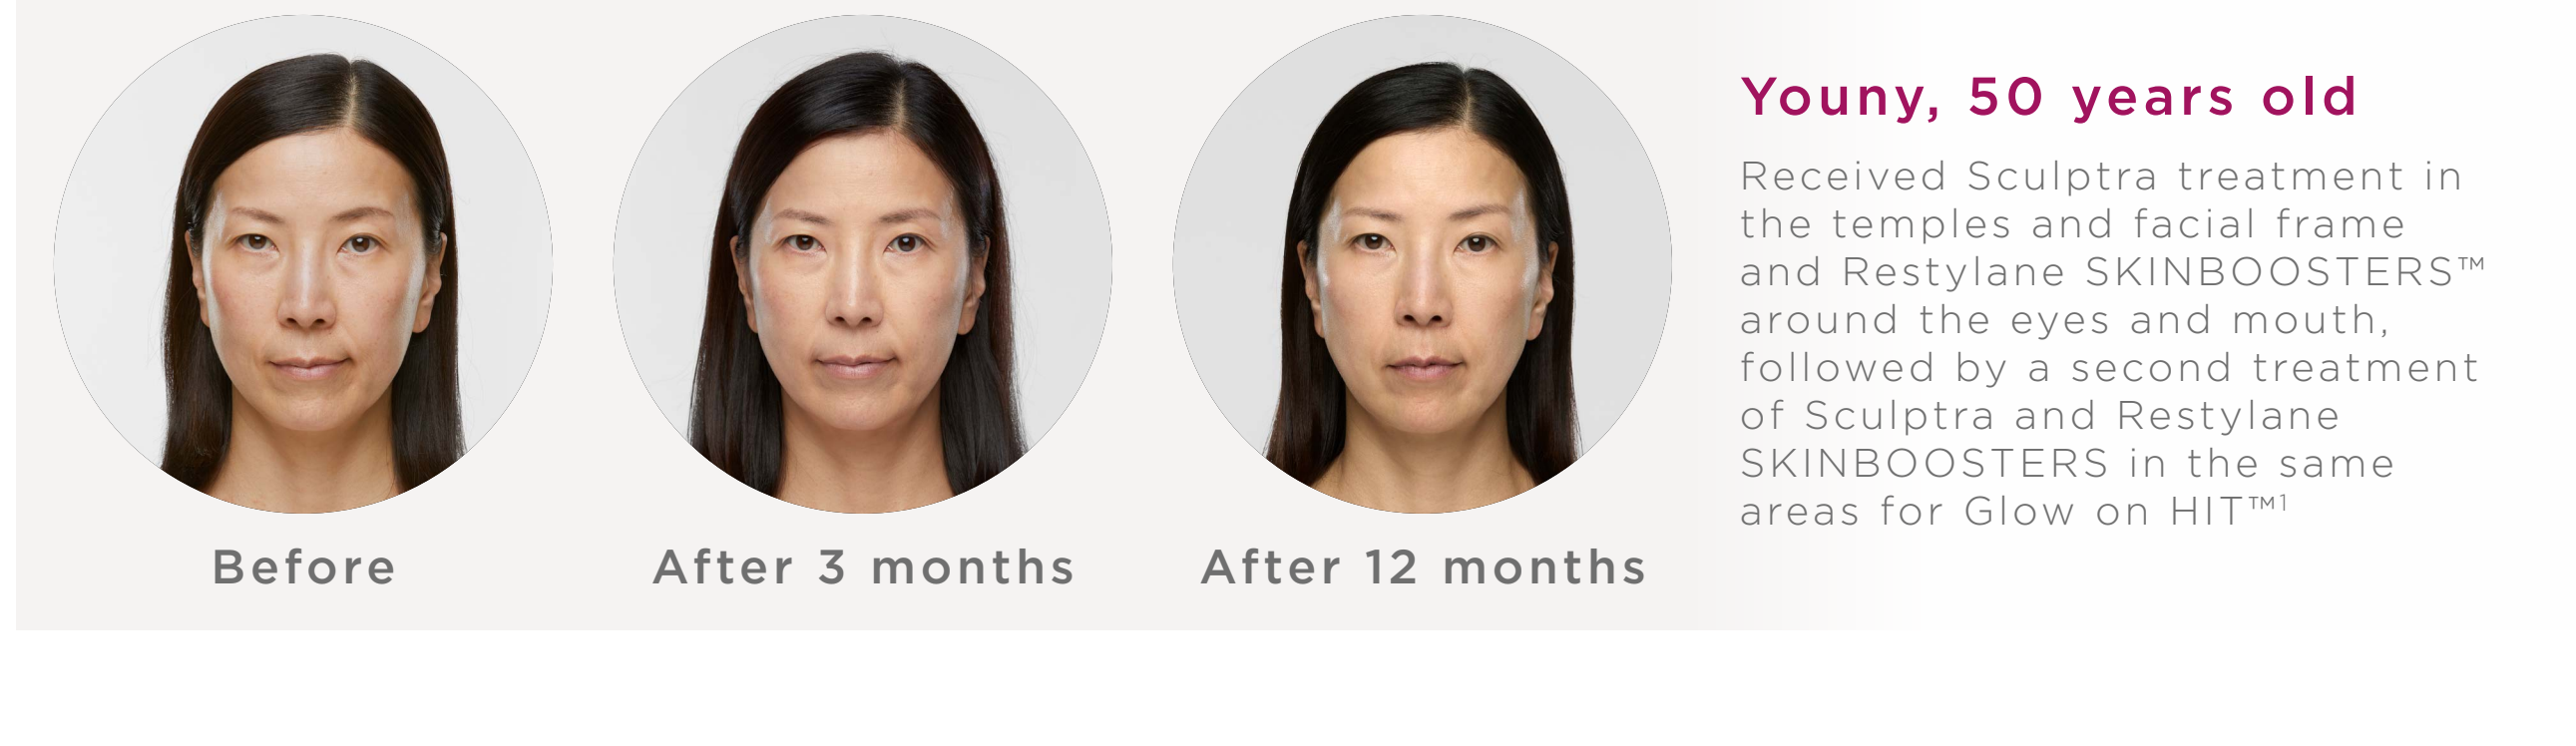

*“My experience with the Sculptra and Restylane treatments was very successful. I really noticed the difference one day when I was with my 24-year-old daughter and someone mistook me for her sister. Looking at myself in the mirror has become a pure pleasure. I see myself looking **younger** physically, while keeping today's maturity. My face has changed in a very positive and **natural** way. I noticed improved skin texture and a lifting, **rejuvenating** effect, all while keeping a natural look.”*

*“I chose Sculptra and Restylane because it's a proven treatment. I hadn't anticipated quite what a difference it would make just in my own personal **self-confidence**. I think the moment I noticed a visible difference was a selfie I had to take for work. I remember looking at it and thinking: I don't need to change a thing. If I had known how I would feel after the treatment years ago, truthfully, I would have done it a lot sooner. I just feel very much more a secure person in my own skin.”*

*“This journey, to sum it up for me, would be just looking after myself – just me, my **beauty**, just myself. I feel like regaining my confidence back. I just love the fact that this treatment will **regenerate** my skin by itself. I can see my skin a lot firmer than before.”*

Each story highlights how Sculptra can address **different needs and goals**, on its own or in combination with Restylane to restore natural volume, improve skin quality, or create a lifting effect.¹⁻⁶ Beyond the **subtle, natural-looking, long-lasting results**, people experienced something more powerful: renewed **confidence, self-recognition, and wellbeing**.¹ For all, it was a positive first step into the world of aesthetic treatments.
